ADVISORY ACTION

The amendment filed 24 January 2004 under 37 CFR 1.116 in reply to the final rejection has been considered but is not deemed to place the application in condition for allowance and will not be entered as does not simply the issues for appeal and/or raises new issues requiring further consideration.

In particular, the proposed amendment is not deemed to place the application in better form for appeal by materially simplifying the issues for appeal in that proposed amended claim 6 (which is newly dependent on claim 4) appears to raise issues under 35 USC 112 given that the proposed amendment to claim 4 defines the condition as a user related condition and claim 6 redefines that the condition indicates a time related condition. As used within the instant application, the two terms do not appear to be overlapping (IA: Page 21, Line 21 – Page 22, Line 3) and were furthermore not previously considered by the examiner taken in combination.

With respect to the claim objections, the proposed amendments to the claims appear to overcome the prior objections pertaining to the phrase "said condition".

The amendments to claims 4, 7-9, 11-15, and 17 incorporate subject matter from previously allowed subject matter and/or depend from limitations previously considered in their respective base claims. As these claims do not require more than a cursory review by the examiner, they would be allowable if submitted in a timely separately filed amendment canceling the non-allowable claims.
